

Yogita Verma

Front-End Web Developer

ABOUT ME

A lifelong learner with a passion for technology looking for a front-end developer job. I invite you to take a look at my portfolio and Github to see examples of the many self-initiated projects that I have completed and the technology I'm interested in.

SKILL

- REACT / REDUX
- JAVASCRIPT/ES6
- NODE JS(EXPRESS)
- MONGODB
- BOOTSTRAP 4
- JQUERY
- GIT

PROJECTS

- Movie Flex**
Movie Flex is a movie application which uses React/Redux in which a user can browse Movies and TV shows - fetched using TMDB API - and find more information about them. It also has a search functionality.
- SnapScout**
React Gallery is a gallery created using React and React Router. The route was setup for 4 default pages and a search page. Images in the gallery were displayed using Flickr API and Axios to fetch the data.
- Express Portfolio**
This project showcases all the project that I have built. It stores all the data about the projects in a JSON file. It uses Pug to generate a template which utilizes JSON to generate a markup which is then displayed in the browser.
- Shopping Cart**
Shopping Cart is an e-commerce website that was made using React and React Router to show a variety of shirts.
- Bill Generator**
Generator is a Full-Stack app made to generate bills for food items that the user orders. It is built from scratch using React, React Router, Node.js and Mongo DB.
