SKILLS

- REACT / REDUX
- JAVASCRIPT/ES6
- NODE JS(EXPRESS)
- MONGO-DB
- BOOTSTRAP 4
- JQUERY
- GIT

PROJECTS

Movie Flex
Movie Flex is a movie application which uses React/Redux in which a user can browse Movies and TV shows - fetched using TMDB API - and find more information about them. It also has a search functionality.

SnapScout
SnapScout is a gallery created using React and React Router. The routes was setup for 4 default pages and a search page. Images in the gallery were displayed using Flickr API and Axios to fetch the data.

Express Portfolio
This project showcases all the projects that I have built. It stores all the data about the projects in a JSON file. It uses Pug to generate a template which utilizes JSON to generate a markup which is then displayed in the browser.

Shopping Cart
Shopping Cart is an e-commerce website that was made using React and React Router to show a variety of shirts.

Bill Generator
Bill Generator is a Full-Stack app made to generate bills for food items that the user orders. It is built from scratch using React, React Router, Node.js and Mongo DB.
